Projects:

Cyclops:

Cyclops is the sales tool of Travelpass group. Cyclops is an application which will be used by a call center agent to reserve hotel rooms via phone.

Our Job is to develop and maintain Cyclops from which users can easily access and complete their bookings for customers.

Technologies: Ruby on Rails, Javascript, Git, Postgres, HTML, CSS

Role: Senior Software Engineer

Monsterquote:

Monsterquote is an online auction service. Customers will book an appointment for window coverings for their home. They will get a list of best quotes from service professionals. And based on quote price and their ratings/profile, customers will assign work to them.

Our Job is to develop a website for monsterquote i.e. https://www.monsterquote.com from which users can easily assign the work and get it work done by other users.

Technologies – Ruby on Rails, CSS, JS, HTML, Git, MySQL

Role: Software Developer

Overhaul Bids:

Overhaul Bids is the fastest way for aircraft owners to find shops and pricing for engine overhauls and inspections. We created this website to solve the industry shortcomings that we experienced during an engine overhaul project. Now aircraft owners can enjoy a single source of pricing, reviews, and knowledge for their engine overhauls and inspections. They can save time, money, and make informed decisions.

Our Job is to develop a website for Overhaul Bids i.e. https://www.overhaulbids.com from which users can easily assign the work and get it work done by other users.

Technologies – Ruby on Rails, CSS, JS, HTML, Git, MySQL

Role: Software Engineer

Reverse Auction Software:

Reverse auctions are auctions where the bidder is the seller and not the buyer. The bid reflects how much the buyer is being asked to pay. Web-based reverse auctions have become extremely popular for purchasing large amounts of goods or services at the corporate level.

Against popular belief, the lowest bid is not always the winner. It would be if all sellers were offering the same exact items and the buyer could consider all offers absolutely similar.

In the real world, most bids will be slightly different and will always have something specific attached to them. The simple fact that the seller is different and carries its own reputation, will suffice to make a higher bid win against a similar offer made by a less reputable seller.

Technologies – Ruby on Rails, CSS, JS, HTML, Git, MySQL

Role: Software Engineer

WiComply:

BRI provides unique, independent and comprehensive services to the corporate sectors. This system is designed for organizations that possess extensive and varied responsibilities related to risk and incident management, safety, security and liability.
Technologies: Ruby 2.0.0, Rails 4.1.2, Postgres, jQuery, BackboneJS, Redis, GMap API.
Role: Software Trainee Engineer

Achievements:

- Surpassing Expectations Award at Cuelogic Technologies in Sept 2018.
- Outstanding Contribution Award at Developscript LLC in Dec 2015

Educational Details:

Qualification	Institute	University/Board	Marks	Class	Year
